Source-Specific Form 7 Applications

There are **specific** Form 7 Applications available on the [DEQ website](#) for the sources listed below:

- Asphalt plants (Form 7A)
- Crematories (Form 7B)
- Concrete Batch Plant (Form 7C)

VIRGINIA DEPARTMENT OF ENVIRONMENTAL QUALITY - AIR PERMITS LOCAL GOVERNING BODY CERTIFICATION FORM	
Business Entity Name (same name on file with the Virginia SCC) LifeNet Health	Registration Number: 61491
Applicant's Name: LifeNet Health	Name of Contact Person at the site: Ron McIntosh
Applicant's Mailing address: 1864 Concert Drive, Virginia Beach, VA 18053	Contact Person Telephone Number: Office – 1 (757) 609-4217 Cell – 1 (757) 761-5560
Facility location (also attach map): 1864 Concert Drive, Virginia Beach, VA 23453	
Facility type, and list of activities to be conducted: Allograft preparation and equipment sterilization	
<p>The applicant is in the process of completing an application for an air pollution control permit from the Virginia Department of Environmental Quality. In accordance with § 10.1-1321.1, Title 10.1, Code of Virginia (1950), as amended, before such a permit application can be considered complete, the applicant must obtain a certification from the governing body of the county, city or town in which the facility is to be located that the location and operation of the facility are consistent with all applicable ordinances adopted pursuant to Chapter 22 (§§ 15.2-2200 <u>et seq.</u>) of Title 15.2. The undersigned requests that an authorized representative of the local governing body sign the certification below.</p>	
Applicant's signature: 	Date: 04/20/2021
<p>The undersigned local government representative certifies to the consistency of the proposed location and operation of the facility described above with all applicable local ordinances adopted pursuant to Chapter 22 (§§15.2-2200 <u>et seq.</u>) of Title 15.2. of the Code of Virginia (1950) as amended, as follows:</p> <p>(Check one block)</p> <p><input type="checkbox"/> The proposed facility is fully consistent with all applicable local ordinances.</p> <p><input type="checkbox"/> The proposed facility is inconsistent with applicable local ordinances; see attached information.</p>	
Signature of authorized government representative:	Date:
Type or print name:	Title:
County, city or town:	

[THE LOCAL GOVERNMENT REPRESENTATIVE SHOULD FORWARD THE SIGNED CERTIFICATION TO THE APPROPRIATE DEQ REGIONAL OFFICE AND SEND A COPY TO THE APPLICANT.]

VIRGINIA DEPARTMENT OF ENVIRONMENTAL QUALITY – 2021 AIR PERMIT APPLICATION FEES
VALID JANUARY 1, 2021 TO DECEMBER 31, 2021

Air permit applications are subject to a fee and fee are adjusted January 1 of each calendar year. **The fee does not apply to administrative amendments or [true minor sources](#).** Applications will be considered incomplete if the proper fee is not paid and will not be processed until full payment is received. **Air permit application fees are not refundable. Please contact the Regional Air Permit Manager if you are unsure of your fee amount.**

Step 1: Send this **ORIGINAL** form and a check (or money order) payable to "Treasurer of Virginia" to:

Department of Environmental Quality
 Receipts Control
 P.O. Box 1104
 Richmond, VA 23218

OR
 FOR OVERNIGHT
 DELIVERY

Department of Environmental Quality
 Receipts Control
 1111 East Main Street, Suite 1400
 Richmond, VA 23219

Step 2: Send a **COPY** of this form with the permit application to the appropriate [DEQ Regional Office](#)

Step 3: Retain a copy for your records. Questions should be directed to the DEQ regional office where the application will be submitted

APPLICATION FEE FORM DEFINITIONS:

Administrative amendment – An administrative change to a permit issued pursuant to Article 1 (9VAC5-80-50 et seq.), Article 3 (9VAC5-80-360 et seq.), Article 5 (9VAC5-80-800 et seq.), Article 6 (9VAC5-80-1100 et seq.), Article 7 (9VAC5-80-1400 et seq.), Article 8 (9VAC5-80-1605 et seq.), or Article 9 (9VAC5-80-2000 et seq.) of 9VAC5 Chapter 80. Administrative amendments include, but are not limited to, the following:

- Corrections of typographical or any other error, defect or irregularity which does not substantially affect the permit,
- Identification of a change in the name, address, or phone number of any person identified in the permit, or of a similar minor administrative change at the source,
- Change in ownership or operational control of a source where the board determines that no other change in the permit is necessary, provided that a written agreement containing a specific date for transfer of permit responsibility, coverage, and liability between the current and new permittee has been submitted to the board.

Major new source review permit (Major NSR permit) – A permit issued pursuant to Article 7 (9VAC5-80-1400 et seq.), Article 8 (9VAC5-80-1605 et seq.), or Article 9 (9VAC5-80-2000 et seq.) of 9VAC5 Chapter 80. **For purposes of fees, the Major NSR permit also includes applications for projects that are major modifications.**

- An Article 7 permit is a preconstruction review permit (case-by-case Maximum Achievable Control Technology (MACT) determination) for the construction or reconstruction of any stationary source or emission unit that has the potential to emit, considering controls, 10 tons per year or more of any individual hazardous air pollutant (HAP) or 25 tons per year or more of any combination of HAPs and EPA has not promulgated a MACT standard or delisted the source category.
- An Article 8 permit is for a source (1) with the potential to emit over 250 tons per year of a single criteria pollutant OR (2) is in one of the listed source categories under [9VAC5-80-1615](#) and has the potential to emit over 100 tons per year of any criteria pollutant OR (3) with the potential to emit over 100,000 tons per year of CO₂ equivalent (CO₂e) (9VAC5-85 Part III). PSD permits are issued in areas that are in attainment of the National Ambient Air Quality Standards.
- An Article 9 permit is a preconstruction review permit for areas that are in nonattainment with a National Ambient Air Quality Standard (NAAQS). Nonattainment permits are required by any major new source that is being constructed in a nonattainment area and is major for the pollutant for which the area is in nonattainment. Nonattainment permitting requirements may also be triggered if an existing minor source makes a modification that results in the facility being major for the pollutant for which the area is in nonattainment. A major source is any source with potential to emit over 250 tons per year of a single criteria pollutant or is in one of the listed source categories under [9VAC5-80-2010](#) and the potential to emit over 100 tons per year of any criteria pollutant. However, if any area is in nonattainment for a specific pollutant, the major source threshold may be lower for that pollutant. For example, sources locating in the Northern Virginia Ozone Nonattainment Area which are part of the [Ozone Transport Region](#) would be a major source if they have the potential to emit more than 100 tons per year of NO_x and/or 50 tons per year of VOC regardless of source category. Nonattainment permits do not require an air quality analysis but require a source to control to the Lowest Achievable Emission Rate (LAER) and to obtain offsets.

Major NSR permit amendment – A change to a permit issued pursuant to Article 7 (9VAC5-80-1400 et seq.), Article 8 (9VAC5-80-1605 et seq.), or Article 9 (9VAC5-80-2000 et seq.) of 9VAC5 Chapter 80. **Only minor amendments and significant amendments are included in this category.**

Minor new source review permit (Minor NSR permit) – A permit to construct and operate issued under Article 6 (9VAC5-80-1100 et seq.) of 9VAC5 Chapter 80. Minor NSR permits are 1) categorically required; or 2) issued to sources whose uncontrolled emission rate for a regulated criteria pollutant is above exemption thresholds and permitting allowables are below Title V thresholds, and/or 3) issued to sources whose potential to emit for a toxic pollutant is above state toxic exemption thresholds and permitting allowables are below Title V thresholds. The minor NSR permit can be used to establish synthetic minor limits for avoidance of state major, PSD and/or Title V permits. **For purposes of fees, the Minor NSR permit also includes exemption applications and applications for projects at existing sources.**

Minor NSR amendment - A change to a permit issued pursuant to Article 6 (9VAC5-80-1100 et seq.) of 9VAC5 Chapter 80. **Only minor amendments and significant amendments are included in this category.**

Sources subject to Synthetic Minor permitting requirements - Stationary sources whose potential to emit exceeds the Title V threshold (100 tons per year of a criteria pollutant, 10/25 tpy of HAPs, and/or 100,000 tpy CO₂e) but have taken federally enforceable limits, either through a state operating permit or a minor NSR permit, to avoid Title V permit applicability.

Sources subject to Title V permitting requirements – Stationary sources that have a potential to emit above the Title V thresholds or are otherwise applicable to the Title V permitting program.

State major permit – A permit to construct and operate issued under Article 6 (9VAC5-80-1100 et seq.) of 9VAC5 Chapter 80. State major permits are for facilities that have an allowable emission rate of more than 100 tons per year, but less than 250 tons per year, of any criteria pollutant and are not listed in the 28 categories under “major stationary source” as defined in [9VAC5-80-1615](#).

State operating permit (SOP) – A permit issued under Article 5 (9VAC5-80-800 et seq.) of 9VAC5 Chapter 80. SOPs are most often used by stationary sources to establish federally enforceable limits on potential to emit to avoid major New Source Review permitting (PSD and Nonattainment permits), Title V permitting, and/or major source MACT applicability. SOPs can also be used to combine multiple permits from a stationary source into one permit or to implement emissions trading requirements. The State Air Pollution Control Board, at its discretion, may also issue SOPs to cap the emissions of a stationary source or emissions unit causing or contributing to a violation of any air quality standard or to establish a source-specific emission standard or other requirement necessary to implement the federal Clean Air Act or the Virginia Air Pollution Control Law.

SOP permit amendment - A change to a permit issued pursuant to Article 5 (9VAC5-80-800 et seq.) of 9VAC5 Chapter 80. **Only minor amendments and significant amendments are included in this category.**

Title V permit – A federal operating permit issued pursuant to Article 1 (9VAC5-80-50 et seq.) or Article 3 (9VAC5-80-360 et seq.) of 9VAC5 Chapter 80. Facilities which (1) have the potential to emit of air pollutants above the major source thresholds, listed in [9VAC5-80-60](#) OR (2) are area sources of hazardous air pollutants, not explicitly exempted by EPA OR (3) have the potential to emit over 100,000 tons per year of CO₂ equivalent (CO₂e) (9VAC5-85 Part III), are required to obtain a Title V permit. For purposes of fees, the Title V permit also includes Acid Rain (Article 3) permit applications.

Title V permit modification - A change to a permit issued pursuant to Article 1 (9VAC5-80-50 et seq.) or Article 3 (9VAC5-80-360 et seq.) of 9VAC5 Chapter 80. Only minor modifications and significant modifications are included in this category.

Title V permit renewal – A renewal of a Title V permit pursuant to Article 1 (9VAC5-80-50 et seq.) of 9VAC5 Chapter 80. Title V permits are renewed every 5 years and a renewal application must be submitted to the regional office no sooner than 18 months and no later than 6 months prior to expiration of the Title V permit. For purposes of fees, the Title V permit renewal also includes Acid Rain (Article 3) permit renewal applications.

True minor source – A source that does not have the physical or operational capacity to emit major amounts (even if the source owner and regulatory agency disregard any enforceable limits). For further information regarding the definition of a true minor source, see [DEQ's website](#).

DOCUMENT CERTIFICATION FORM

I certify under penalty of law that this document and all attachments [as noted above] were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering and evaluating the information, the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations.

I certify that I understand that the existence of a permit under [Article 6 of the Regulations] does not shield the source from potential enforcement of any regulation of the board governing the major NSR program and does not relieve the source of the responsibility to comply with any applicable provision of the major NSR regulations.

☐ Other (specify): _____

Explanation of Permit Request (attach documents if needed):

Replacement of EO sterilizers with newer models – 3M is discontinuing support of the 8XL sterilizers. LNH has been working with 3M to have 4 of the sterilizers at Concert Drive replaced with the newer models, GSX series. Two of the 8XL abators will be kept online at Concert until 2022, so we will still have a total of 6 sterilizers at that location. The goal is to have the sterilizers replaced in a phased approach throughout 2021. The GSX series use the same weight gas cannister and our monthly usage rates will not change. The new sterilizers will feed to our existing abators.

GENERAL INFORMATION (CONTINUED)**For Portable Plants:**

Is this facility designed to be portable?

☐ Yes ☒ No

- If yes, is this facility already permitted as a portable plant? ☐ Yes ☐ No Permit Date: _____

If not permitted, is this an application to be permitted as a portable plant? ☐ Yes ☐ NoIf permitted as a portable facility, is this a notification of relocation? ☐ Yes ☐ No

- Describe the new location or address (include a site map): _____

- Will the portable facility be co-located with another source? ☐ Yes ☐ No Reg. No. _____

- Will the portable facility be modified or reconstructed as a result of the relocation? ☐ Yes ☐ No

- Will there be any new emissions other than those associated with the relocation? ☐ Yes ☐ No

- Is the facility suitable for the area to which it will be located? (attach documentation) ☐ Yes ☐ No

Describe the products manufactured and/or services performed at this facility:

Allograft preparation and equipment sterilization

Code O – Vent/Stack Configuration

1. Stack discharging downward, or nearly downward
2. Equivalent stack representing a combination of multiple actual stacks
3. Gooseneck stack
4. Stack discharging in a horizontal direction
5. Stack with an unobstructed opening discharge in a vertical direction
6. Vertical stack with a weather cap or similar obstruction in exhaust system

* Specify units for each heating value in Btus per unit of fuel.

☒ Estimated Emission Calculations Attached (totals and per Unit Ref. No.)

* **Specify the name of the toxic pollutant/HAP for each Unit Ref. No. along with the respective CAS Number.** Toxic Pollutant means a pollutant on the designated list in the Form 7 Instructions document. Particulate matter and volatile organic compounds are not toxic pollutants as generic classes of substances, but individual substances within these classes may be toxic pollutants because their toxic properties or because a TLV (tm) has been established.

* **Other Regulated Pollutant** include Fluorides, Sulfuric Acid Mist, Hydrogen Sulfide (H₂S), Total Reduced Sulfur (including H₂S), Reduced Sulfur Compounds (including H₂S), Municipal Waste Combustor Organics (measured as total tetra-through octa-chlorinated dibenzo-p-dioxins and dibenzofurans), Municipal Waste Combustor Metals (measured as particulate matter), Municipal Waste Combustor Acid Gases (measured as the sum of SO₂ and HCl), and Municipal Solid Waste Landfill Emissions (measured as nonmethane organic compounds).

Form 7 – Virginia New Source Review and State Operating Permit Application – Valid 1/1/2021 to 12/31/2021

Proffer Statements

- The Property shall be developed as an office, research, distribution and warehouse facility, and shall be subject to the terms of that certain Proffer Agreement between Lifenet and the City of Virginia Beach, which is part of the Proffer Agreement. Any other use of the Property shall be subject to the terms of that certain Proffer Agreement.
- The buildings and other structures on the Property shall be developed consistent with the site plan, elevations, and rendering attached as exhibits to the Proffer Agreement (collectively, "Conceptual Plans"), which is on file with the City. The site and building design shall conform to the requirements of the Conceptual Plans. All structures shall be established within the boundaries outlined in Proffer 1.
- The primary exterior building materials utilized on the principal structures located on the Property shall consist of any combination of the following: brick, glass, metal, pre-cast concrete, or stone, and will be consistent with the building materials listed in the immediate vicinity.
- All outdoor lighting shall be shielded to direct light and glow onto the premises; no light spillover shall be permitted, and no light shall be directed away from the property. Any outdoor lighting shall be shielded to direct light and glow onto the premises; no light spillover shall be permitted, and no light shall be directed away from the property.
- The Property shall be used for office, research, distribution, warehouse, and other uses as approved by the City.
- All such uses as improvements are envisioned on that approximately 6.5-acre parcel adjacent to the intersection of Princess Anne Road and Connet Drive, which is part of the Property, the owner of said parcel will accept with transferring the corner of the Property at the intersection of Princess Anne Road and Connet Drive.
- Lifenet will submit to the City's Director of Planning all site, landscaping and architectural plans for the development of the Property for review and approval in conformance with the terms of the Proffer Agreement. The development of the Property shall be subject to the terms of the Proffer Agreement. If the Director of Planning does not approve the Plans, the reasons therefor shall be clearly and specifically set forth in writing so that the objections may be addressed and resolved. If the Director of Planning and Lifenet cannot resolve the objections, Lifenet shall have the right to appeal the objections of the Director of Planning to the City Manager or his designee. However, if the objections cannot be resolved with the City Manager or his designee, Lifenet will have the right to appeal the objections to City Council. All appeals by the City shall be at its reasonable discretion, and the City's approval or specific objections shall be delivered to Lifenet no later than thirty (30) days after submission of the Plans or request for review by the City Manager or the City Council. Lifenet shall make any such request for review after the final opinion is rendered by the Director of Planning or the City Manager as applicable. The City shall not impose a restriction on the Property or the Option Period prohibiting any modification of the Property or the Option Period without the prior written consent of the City, which consent shall not be unreasonably withheld. The foregoing requirements and restrictions shall be included in the deed of conveyance of the Property and the Option Period to Lifenet.
